Unlocking the Power of Ecommerce Recommendations with BGN Link Prediction

Binzhou, China — June 6, 2021

Step into the future of ecommerce recommendations with Guoguang Liu's innovative algorithm based on Bipartite Graph Network (BGN) link prediction.

Dive into a world where traditional ecommerce algorithms are a thing of the past. Liu's algorithm not only boosts accuracy but also injects diversity into recommendations, revolutionizing the ecommerce landscape.

Through the magic of BGN link prediction and SMN projection, Liu's algorithm crafts a new era of ecommerce recommendations that outshine the rest in accuracy and coverage.
